

## Bible Poverty Index (BPI)

4K Mapping, University of the Nations. March 1, 2017 version

This index has been created to help determine where on the Bible Poverty (BP) spectrum a language is located. The codes and colors are meant to help those with a heart to end Bible Poverty have a clearer picture of the needs of a language in its Bible engagement process.

The following chart is a guide to the entire list:

<u>BPI</u>	<u>BP Status</u>	<u>Language</u>	<u>Country</u>	<u>Continent</u>	<u>Language Code</u>
0	No Bible	Mpade	Cameroon	Africa	mpi
1	Translation	Yuwana	Venezuela	Americas	yau
2	Publication	Tawang Monpa	India	Asia	twm
3	Distribution	Chuvash	Russian Federation	Europe	chv
4	Engagement	Tongan	Tonga	Pacific	ton

### Goals:

- Have **ZERO** languages in the **ZERO** category!
- Get every language into the **BLUE!**

### Definitions:

**0-No Bible:** Needs translation. There is no Bible translated into this language.

**1-Translation:** Needs to be published or completely translated. Sections of the Bible have been translated into written text.

**2-Publication:** Needs to be distributed. Translation of New Testament, Old Testament, or Full Bible have been translated and published in one or more of the following types: written text, audio recordings, JesusFilm, online digital text.

**3-Distribution:** Needs engagement, training, discipleship, etc. Some distribution of the available Bible resources has occurred to at least a small percentage of the language group in paper text, some digital resources, and JesusFilm viewings.

**4-Engagement:** Needs continual, ongoing training and discipleship. The people in this language group are engaging with the Bible, whether through church or other means.
